Portfolio: <https://soulhacker.netlify.app> | **LinkedIn:** <https://www.linkedin.com/in/baranidharanjaisankar>

Executive Summary

Software Development Engineer with professional experience in software development and application maintenance. Strong foundation in Java, Spring Boot, REST API development, and relational database design, with hands-on experience building and maintaining backend applications. Experienced in application development, debugging, deployment, and database integration, with a growing focus on backend engineering and cloud technologies.

Work Experience

Software Development Engineer (SDE)

Skryptee Innovations Pvt. Ltd | June 2026 - Present

- Develop, maintain, and improve software applications and product features based on evolving business requirements.
- Troubleshoot application issues, identify root causes, and implement fixes while supporting ongoing application maintenance.
- Manage application updates, deployments, testing, and continuous product improvements in collaboration with the development team.

Software Developer Intern

Skryptee Innovations Pvt. Ltd | October 2025 – March 2026

- Assisted with application development, testing, and debugging.
- Supported feature implementation and application maintenance.
- Contributed to day-to-day development activities.

Technical Skills

Programming Languages: Java, JavaScript, SQL

Backend Technologies: Spring Boot, Spring Data JPA, Hibernate, REST APIs

Database Systems: MariaDB, MySQL, MongoDB, PostgreSQL

Tools & Version Control: Git, GitHub, Postman, Maven, Swagger/OpenAPI

Software Packages: IntelliJ IDEA, VS Code, Android Studio

Core Concepts: Object-Oriented Programming (OOP), DBMS, MVC & Layered Architecture

Projects

SENTINEL – Vehicle Incident Reporting & Public Safety System

Tech Stack: Java, Spring Boot, Spring Security, JWT, Spring Data JPA, MySQL, Kotlin, Jetpack Compose, Retrofit, REST APIs.

- Developed a vehicle incident reporting system with a Spring Boot backend and native Android application.
- Implemented JWT-based authentication and REST API integration using Retrofit.
- Built incident reporting with immediate safety guidance, unique report IDs, and status tracking.
- Designed report workflows for investigation, resolution, and rejection of submitted incidents.
- Integrated MySQL for data persistence and deployed the backend for mobile application access.

MediPulse API – Healthcare Appointment Management System

Tech Stack: Java, Spring Boot, Spring Web, Spring Data JPA, Hibernate, MySQL, Maven, Swagger/OpenAPI, Lombok.

- Developed a RESTful healthcare appointment management API using Spring Boot and layered architecture.
- Designed patient, doctor, and appointment modules with Spring Data JPA and MySQL integration.
- Implemented DTO responses, validation, exception handling, and Swagger/OpenAPI documentation for reliable API development.

Education

Bachelor of Computer Applications (BCA) - Bharathidasan University, Trichy, Tamil Nadu

2023–2026 | CGPA: 8.02

Certifications

Google Cloud Platform - Cloud Computing Foundations,

Infosys Springboard - Java Spring Boot, Object Oriented Programming using Python, Introduction to Cyber Security, Security Standards & Regulations

IBM SkillsBuild - AI & Generative AI, Code generation & Optimization with IBM Granite

GUVI (HCL Group) - Generative AI & Prompt Engineering ChatGPT for Everyone Generative AI & Prompt Engineering

Languages Known

Tamil – Native Proficiency

English – Professional Working Proficiency
