Portfolio : <https://soulhacker.netlify.app> | LinkedIn : <https://www.linkedin.com/in/baranidharanjaisankar>

Executive Summary

BCA graduate with a strong foundation in Java, Spring Boot, REST API development, and relational database design. Experienced in building scalable backend applications using layered architecture, Spring Data JPA, Hibernate, and SQL databases. Passionate about clean code, API design, system architecture, and cloud technologies. Continuously expanding expertise through hands-on projects, Google Cloud learning, and modern backend development practices.

Technical Skills

Programming Languages: Java, JavaScript, SQL

Backend Technologies: Spring Boot, Spring Data JPA, Hibernate, REST APIs

Database Systems: MariaDB, MySQL, MongoDB, PostgreSQL

Tools & Version Control: Git, GitHub, Postman, Maven

Software Packages : IntelliJ IDEA ,Vs Code

Core Concepts: Object-Oriented Programming (OOP), DBMS, MVC & Layered Architecture

Projects

SENTINEL – Vehicle Incident Reporting & Public Safety System

Tech Stack: Java, Spring Boot, Spring Security, JWT, Spring Data JPA, MySQL, Kotlin, Jetpack Compose, Retrofit, REST APIs.

- Developed a vehicle incident reporting system with a Spring Boot backend and native Android application.
- Implemented secure JWT-based authentication and REST API integration using Retrofit.
- Built incident reporting with immediate safety guidance, unique report IDs, and report status tracking.
- Designed report management workflows for investigation, resolution, and rejection of submitted incidents.
- Integrated MySQL for data persistence and deployed the backend for mobile application access.

MediPulse API – Healthcare Appointment Management System

Tech Stack: Java, Spring Boot, Spring Web, Spring Data JPA, Hibernate, MySQL, Maven, Swagger/OpenAPI, Lombok

- Developed a RESTful healthcare appointment management API using Spring Boot following layered architecture.
- Designed modules for patient, doctor, and appointment management with Spring Data JPA and MySQL integration.
- Implemented DTO-based responses, custom exception handling, and request validation to improve API reliability.
- Documented and tested REST endpoints using Swagger/OpenAPI while managing dependencies with Maven.

Education

Bachelor of Computer Applications (BCA)

Bharathidasan University – Trichy, Tamil Nadu

2023 – 2026

Certifications

Google Cloud

- Google Cloud Computing Foundations Certificate
- Skills Boost: Cloud Computing Fundamentals, Infrastructure, Networking & Security, Data, ML & AI
- Build a Secure Google Cloud Network • Set Up an App Development Environment on Google Cloud • Implementing Cloud Load Balancing for Compute Engine

Infosys Springboard

- Java Spring Boot • Object-Oriented Programming using Python • Introduction to Cyber Security • Security Standards & Regulations

IBM SkillsBuild

- Getting Started with Artificial Intelligence • Generative AI in Action • IBM Granite: Code Generation & Optimization, Data Classification & Summarization

GUVI (HCL Group)

- ChatGPT for Everyone: Complete Generative AI & Prompt Engineering

Languages Known

Tamil – Native Proficiency

English – Professional Working Proficiency
